ALEX MOREHEAD

Machine Learning & Computational Biology Researcher

amorehead.github.io | alex.morehead@gmail.com | Berkeley, California, USA | amorehead | alexmorehead/
IYHJU5EAAAAJ | 0000-0002-0586-6191

"Machine Learning & Computational Biology Researcher with over 5 years of experience developing cutting-edge deep learning algorithms for geometric (e.g., structural biology) data. Track record of bringing new ideas to life and implementing them using AI-standard programming languages/frameworks. Experienced leading research teams, fostering collaborations, and presenting research findings at top conferences."

SKILLS

Research | Teaching | Python | PyTorch | PyG | PyTorch Lightning | W&B | Hydra | Slurm | Git | LaTeX

Geometric deep learning | Generative modeling | Graph neural networks | AI4Science | CompBio/Chem

EXPERIENCE

Hopper Postdoctoral Fellow (Supervisor: Dr. Michael Mahoney)

Lawrence Berkeley National Laboratory | International Computer Science Institute

Jun 2025 – Ongoing | California, USA

Awarded Berkeley Lab's **2025 Hopper Postdoctoral Fellowship** in computing sciences, courtesy of NERSC.

- Research and develop **scientific foundation models**, including the **Zatom** series of models, at LBNL and ICSI.
- Conduct **large-scale** deep learning HPC experiments and make contributions to **open-source code** along the way.

Deep learning | Generative models | AI4Science | CompBio/Chem | Scientific machine learning

Graduate Research Assistant (Supervisor: Dr. Jianlin Cheng)

University of Missouri | Bioinformatics & Machine Learning Lab

Aug 2020 – May 2025 | Missouri, USA

Awarded two competitive first-year PhD fellowships and the **outstanding PhD** awards for EECS/CS graduate studies.

- Researched geometric and generative modeling methods for bioinformatics, yielding **20+ academic works**.
- Developed two state-of-the-art protein representation learning methods along with the first diffusion model to successfully generate valid large 3D molecules and flow model for blind protein-ligand docking. Published results at top-tier machine learning conferences (**ICLR**) and scientific venues (**ISMB** / **Bioinformatics**, **CASP16**, **Nature Machine Intelligence**, & **Communications Chemistry**).
- Introduced the first deep learning benchmark for **broadly applicable** protein-ligand docking.
- Orchestrated several **large-scale** deep learning HPC experiments and contributed to **open-source code**.

Deep learning | Geometric & graph representation learning | Generative models | Structural bioinformatics

Research Intern (Supervisor: Dr. Jeffrey Ruffolo)

Profluent Bio | AI Research Lab

May 2023 – Aug 2023 | California, USA

- Created **MMDiff**, the first SE(3) diffusion model for joint sequence-structure generation of DNA, RNA, and proteins, which achieved a **9% nucleic acid design success rate**. Presented at NeurIPS 2023 MLSB. **Paper** and **Code**.

Diffusion models | Structure generation | Sequence generation | Differential geometry | Google Cloud

Teaching Assistant (Supervisor: Lukin Murphy)

EnCircle Technologies | Programming Curriculum

May 2022 – Aug 2023 | Missouri, USA

- Crafted and taught special education computer science curriculum for neurodivergent youth, ultimately implementing **reinforcement learning algorithms in a collaborative Minecraft environment**. **Open-source curriculum**.

Teaching | Curriculum development | Computer science | Python programming | Machine learning

ACHIEVEMENTS

Berkeley Lab's 2025 Hopper Postdoctoral Fellow
• Won a *competitive* postdoctoral fellowship for recent PhD graduates in computing sciences.

LoG Top-10 Reviewer
• Awarded large monetary prize for being a *top-3%* reviewer for the 2023 Learning on Graphs (LoG) conference.

Dean's Engineering Excellence & O'Neill Graduate Fellowships and Top-Ranked EECS/CS PhD Student Awards
• Won *two* competitive graduate fellowships for first-year PhD students and the *outstanding EECS & CS PhD student* awards.

Public outreach
• Research featured in *two* public-facing venues including HPCwire and Marktechpost.

INVITED TALKS

- Zatom-1: A Multimodal Flow Foundation Model for 3D Molecules and Materials, LeMaterial Reading Group, March 2026, Remote
- FlowDock: Geometric Flow Matching for Protein-Ligand Docking and Affinity Prediction, 3DSIG @ ISMB, Jul 2025, Liverpool, UK
- Geometric Deep Learning and Generative Models For Protein-Ligand Docking, Computational modeling of molecular structures course @ MU, Nov 2024, Columbia, Missouri, USA
- RNA-FrameFlow for *de novo* 3D RNA backbone design, SPIGM @ ICML, Jul 2024, Vienna, AT
- A Gated Graph Transformer for Protein Complex Structure Quality Assessment, 3DSIG @ ISMB, Jul 2023, Lyon, FR
- Geometry-Complete Perceptron Networks for 3D Molecular Graphs, AI2ASE @ AAAI, Feb 2023, Washington D.C., USA
- Neural Diffusion Models: Next-Generation Generative Deep Learning, Advanced topics in deep learning course @ MU, Nov 2022, Columbia, Missouri, USA
- Geometric Transformers for Protein Interface Contact Prediction, Xuefeng Cui Lab @ Shandong University, May 2022, Remote

EDUCATION

M.S. & Ph.D. in Computer Science

University of Missouri | O'Neill and College of Engineering Dean's Graduate Fellow

Aug 2020 - May 2025

PhD Topic:
- Geometric Deep Learning & Generative Modeling of 3D Biomolecules

Collaborations:
- University of Cambridge, Research Labs of Prof. Pietro Lió & Prof. Sir Tom Blundell

Coursework:
- Highest distinction (GPA=4.0/4.0)

B.S. in Computer Science

Missouri Western State University | General Studies and Outstanding Graduate Honors

Aug 2016 - May 2020

- Graduated **top of class** among all 2020 graduates in computer science, mathematics, and physics (GPA=4.0/4.0)

FUNDING

- Hopper Postdoctoral **Fellowship**, U.S. Department of Energy, ~$300,000
- Dean's Engineering Excellence **Fellowship**, University of Missouri, $10,000
- O'Neill Graduate **Fellowship**, University of Missouri, $10,000
- XSEDE Hardware **Grant**, U.S. National Science Foundation, $500
- Top-10 Reviewer **Award**, Learning on Graphs Conference, $500

SERVICE

- **Reviewing**:
  - **Conferences & Workshops**:
    - Neural Information Processing Systems (NeurIPS) **[2021-...]**
      - AI4Sci, AI4D3, GenBio, & MLSB workshops **[2021-2025]**
    - International Conference on Learning Representations (ICLR) **[2024-...]**
      - GEM, AI4NA, and FPI workshops **[2024-2025]**
    - International Conference on Machine Learning (ICML) **[2024-...]**
      - AI4Sci, CB, AccMLBio, & SPIGM workshops **[2024-2025]**
      - Served on the ICML ML4LMS workshop's organizing committee **[2024]**
    - Association for the Advancement of Artificial Intelligence (AAAI) **[2025]**
    - Learning on Graphs Conference (LoG) of PMLR **[2024-...]**
      - Served on the LoG conference's organizing comittee **[2024-2026]**
    - ACM Conference on Bioinformatics, Computational Biology, & Health Informatics (ACM BCB) **[2024-...]**
  - **Journals**:
    - Transactions on Machine Learning Research (TMLR) **[2025-...]**
    - Nature Machine Intelligence & Nature Methods **[2023-...]**, Nature Communications **[2025-...]**
    - Bioinformatics, Briefings in Bioinformatics, BMC Bioinformatics, JCIM, and CSB Journal **[2024-...]**
    - IEEE Trans. on Neural Nets. & Learning Systems (TNNLS) & Emerging Topics in Comp. Intell. (TETCI) **[2023-...]**

- **Mentoring**:
  - **Undergraduate Students**:
    - Rishabh Anand (NUS, CS major), now a Master's student at Yale
    - Kyler Zook (MU, CS major)
  - **Graduate Students**:
    - Miruna Cretu (PhD student at Cambridge)
    - Antonia Panescu (PhD student at Yale)
    - Tynan Perez (PhD student at MIT)
    - Ahmed A Elhag (PhD student at Oxford)
    - Arun Raja (PhD student at Oxford)
    - Mahdi Pourmirzaei (PhD student at MU)
    - Zhiyu Wang (Master's student at Cambridge), now an AI engineer at Sapient Intelligence
    - Rylie Weaver (Master's student at CGU), now a PhD student at UTK
    - Pushpa Kumar Balan (Master's student at UCMO)
